COMPETING HYPOTHESES

Dominant Narrative: T1: Iron Ore Cash Generation — Pilbara Delivers (survival probability: 70%)

T1: Iron Ore Cash Generation — Pilbara Delivers [DOMINANT]

70%

Rio's Pilbara iron ore system is the world's lowest-cost major operation, generating exceptional cash flow at current prices.

Watch: Iron ore prices, Pilbara shipment volumes, C1 cost trajectory.

- Evidence gathering in progress.

T2: Energy Transition Portfolio — Copper and Lithium Optionality

40%

Rio is building significant positions in copper (Oyu Tolgoi) and lithium (Arcadium) for the energy transition.

Watch: Oyu Tolgoi ramp-up progress, copper prices, Arcadium integration, lithium price recovery.

- Evidence gathering in progress.

T3: China Demand Slowdown — Property Sector Drag

55%

China's property sector downturn reduces steel and iron ore demand structurally.

Watch: China steel production, property sector starts, iron ore port inventories.

- Evidence gathering in progress.

T4: Growth Capex Risk — Simandou and Arcadium Execution

50%

Over US\$15B in growth capital committed to Simandou, Arcadium, and Oyu Tolgoi carries execution risk.

Watch: Simandou first ore timing, Arcadium impairment testing, total capex vs free cash flow.

- Evidence gathering in progress.

IMPORTANT INFORMATION

This document is prepared by DH Capital Partners Pty Ltd for informational purposes only. It does not constitute financial advice, a recommendation, or an offer to buy or sell any securities.

METHODOLOGY

This analysis uses the Analysis of Competing Hypotheses (ACH) framework, originally developed by Richards Heuer at the CIA for intelligence analysis and adapted here for equity research. ACH evaluates multiple competing explanations against diagnostic evidence, ranking hypotheses by the fewest inconsistencies rather than the most confirmations. This approach is designed to reduce confirmation bias and anchoring effects common in traditional equity research.

Sentiment scores are generated by a three-layer decomposition model separating macro environment, sector/commodity factors, and company-specific research. The 40/60 rule ensures company-specific research always contributes at least 60% of the overall sentiment, maintaining focus on idiosyncratic stock drivers.

LIMITATIONS

- Hypothesis scores are model outputs, not price targets or investment recommendations.
- Evidence assessment involves subjective judgement and may contain errors.
- Past price performance is not indicative of future returns.
- This analysis does not account for individual investor circumstances, risk tolerance, or tax position.
- Data sources include ASX announcements, broker research, company filings, and market data. Errors in source data will propagate.
